

VICTOR MERSEGUEL

FRONT-END DEVELOPER

I consider myself an artist who discovered himself in the world of programming. With knowledge in various technologies, I specialized in Front-End for the integration between logic and aesthetics, between problem-solving and user experience that so intrigue me. My expertise includes **React, HTML5, CSS3, JavaScript, Git, GitHub** and more.

EXPERIENCE - Some projects

Project: **Luciana Castellano** ([Project Link](#))

- Using Next.js 14, this app was built to showcase the client's work and services in an elegant, organized, and efficient manner. It features things like Image Components, Context API, Intersection Observer, and more.

- Technologies: HTML5, CSS3, JavaScript, React, Next.js, Git, GitHub.

Project: **Quiz DEV** ([Project Link](#))

- This app was made to showcase offered services with a custom design built in React. It includes features like local storage for language preference storage, form integration with EmailJS, dynamic data feeding through local database, and more.

- Technologies: HTML5, CSS3, JavaScript, React, Git, GitHub.
